

To whom it may concern.

I would like to add a comment to an earlier email I sent in regards to managing Yukon's wildlife. I know you have gotten a lot of comments at the community meetings in support of trapper incentives, and I think this is a huge step in the right direction. I would add that regulation changes should be made to allow trappers to take non resident hunters out after wolves on their registered trap-lines. This would add value to wolves at no cost to YTG. Thanks
