

PLAN REVIEW

We have committed to two reviews of the 2002-2007 plan. The first will happen in 2004 as a mid-term review to determine progress made on plan implementation. The second will be carried out in 2007 following completion of plan implementation. The plan is flexible, allowing the plan partners, through mutual agreement, to modify the plan at any point during the life of the plan. This would allow the plan to be refocused if necessary, due to new information or management direction from the plan partners.

Results of the plan reviews will be provided to the community either through newsletters, or a public meeting.

Boykinia richardsonii or
Bear flower.
